Crude App!

But it's good enough for what we need!

Hello Pluralsighters!!!

Click the button below to head over to my podcast...

Our Simple Test

Automated Workflow

Summary

The screenshot shows a GitHub repository page for 'nigelpoulton/pluralsight-docker-CI'. The browser address bar shows the URL 'https://github.com/nigelpoulton/pluralsight-docker-CI'. The repository name is 'nigelpoulton / pluralsight-docker-CI'. The page includes a description field, a website field, and a 'Save' button. Below this, there are statistics: 1 commit, 1 branch, 0 releases, and 1 contributor. A progress bar shows the repository is 50% complete. The 'Branch: master' dropdown is visible. The file list shows the following files and their commit history:

File	Commit	Time
test	Initial commit	an hour ago
views	Initial commit	an hour ago
Dockerfile	Initial commit	an hour ago
app.js	Initial commit	an hour ago
circle.yml	Initial commit	an hour ago
package.json	Initial commit	an hour ago
readme.md	Initial commit	an hour ago

The right sidebar contains links to Issues (0), Pull requests (0), Wiki, Pulse, Graphs, and Settings. The SSH clone URL is 'git@github.com:nige'.
